exclamations

“Nick is the real deal – a highly skilled developer and designer...it’s rare indeed to find a guy who combines serious technical chops with a gift for creating beautiful UIs.”

Bryan Sise

Founder, Sise Enterprises

“Nick blends the line between engineer and designer like no other person I know. He’s a valuable asset to any team that he’s on.”

Bryan Shanaver

Technical Director, Fifty&Fifty

experience

2012 Sole Proprietor, Exygen Interactive: San Diego, CA – Aug 2001 - Present

Throughout my professional career, I’ve maintained Exygen Interactive as an outlet for experimenting with new technologies and engaging new and interesting projects. During this time I’ve assisted many small businesses and start-ups in achieving their online goals and ambitions.

2009 Lead Software Architect, Pride-Media Group: San Diego, CA - Aug 2009 - Aug 2010

I was hired by Pride-Media to lead a team of Ruby on Rails developers in building an enterprise-level, SaaS (Software-as-a-service) application for the travel and insurance industries. In addition to software development, my responsibilities included resource management, application and server architecture, vendor evaluation, and customer support.

2008 Software Engineer, Digitaria Interactive: San Diego, CA — May, 2008 - Aug 2009

At Digitaria, I was a member of the FOSS (Free and Open Source Software) Team where we specialized in building large-scale, SaaS applications in Ruby on Rails for Fortune 500 Companies.

2006 Senior Web Developer, 212 Interactive: San Diego, CA — Apr, 2006 - May, 2008

I joined 212 Interactive as a contractor to help alleviate the growing pains of an up-and-coming interactive agency. I was quickly hired on and later promoted to Senior Web Developer where I lead a small team of developers and helped introduce new technologies such as Web Standards, AJAX, Ruby on Rails and Test Driven Development.

2005 Web Designer, Outcome Interactive: San Diego, CA — Apr, 2005 - Apr, 2006

As a web designer at Outcome Interactive, I was responsible for designing attractive, reusable web site templates for small topical law firm web sites. Once approved, I was tasked with transforming these designs into cross-browser, standards-compatible, SEO-friendly web sites.
